12%

ANNUAL ENERGY BILL FOR A TYPICAL  
SINGLE FAMILY HOME IS **\$2,060**

# TOP TEN

## TEN TIPS THAT WILL SAVE YOU MONEY.

- 1.** Replace any light bulb, especially ones that burn more than one hour per day, with a light-emitting diode (LED) bulb.
- 2.** Seal from the inside. Air sealing is an inexpensive way to lower energy costs and improve comfort. Seal gaps and holes in walls, floors, and ceilings with caulk or foam sealant. Look for cracks around windows and where wires and pipes pass through.
- 3.** Plug electronic devices such as cable boxes, printers and TVs into power strips to turn off during vacations or long periods without use. Smart power strips make it an easy task to save money.
- 4.** Change your central HVAC system filter when dirty according to the manufacturers recommendations. Dirty filters can impact your home comfort and increase your electricity bill. Make sure to change out every 30 days.
- 5.** A one degree increase in heating setpoint or reduction in cooling setpoint can increase energy use by 3-5%.
- 6.** Have your duct work checked for leaks. Leaks at the return, air handler and supply can be a major contributor to high bills. Mobile homes should be checked at the grill, cross over duct and down flow air handler, for leaks.
- 7.** Set both the upper and lower water heater thermostats no higher than 125F.
- 8.** An electric space heater can cost more than \$100 per month to operate. Minimize their use, except for limited or temporary spot heating. Turn space heaters off when leaving the room.
- 9.** Ensure refrigerator door seals are tight. Eliminate unnecessary refrigerators.
- 10.** Close shades and drapes during the day to help keep your home cooler in the summer and warmer in the winter.

# LIGHTING

**TRADITIONAL LIGHTING CAN AMOUNT TO 12% OF YOUR MONTHLY ENERGY USE. ENERGY SAVING LIGHT BULBS CAN CUT LIGHTING COSTS BY 75%.**

- 11.** Replace outdoor lighting with its equivalent outdoor-rated LED bulb. LED's work well in cold weather.
- 12.** Use outdoor security lights with a photocell and/or a motion sensor.
- 13.** Turn off unnecessary lighting.

**A LUMEN IS A UNIT USED FOR THE MEASUREMENT OF VISIBLE LIGHT. A TRADITIONAL 60 WATT LIGHT BULB PRODUCES 800 LUMENS. SEE THE CHART BELOW TO SEE HOW MANY WATTS OTHER BULBS USE TO PRODUCE THE SAME AMOUNT OF LIGHT.**

**WATT USAGE  
800 LUMENS**

**Incandescent bulb**

**60 WATTS**

**CFL**

**13 WATTS**

**LED**

**7 WATTS**

# PLUG LOADS

---

## OTHER PLUG LOADS AROUND THE HOME CAN ADD UP TO BE 8-10% OF MONTHLY ENERGY USE.

- 14.** Turn computers and monitors off when not in use.
- 15.** When buying a new computer, consider buying a laptop. It uses less energy than a comparable desktop.
- 16.** Turn large-screen TVs off completely when not in use.
- 17.** Check for energy saving settings on flat-panel TVs like automatic brightness control and a power saving sleep mode.
- 18.** Request an ENERGY STAR® set-top box from cable or satellite provider.
- 19.** Turn off stereos and radios when not in use.
- 20.** Enable auto power down feature on gaming consoles.
- 21.** If you don't unplug them, use energy-saving modes or automatic sleep function on electronics.
- 22.** Remember to turn off hair curling irons and hot rollers.
- 23.** Make sure electric blankets are turned off in the morning.
- 24.** Ensure all new appliances, electronics and lights are ENERGY STAR® labeled.
- 25.** Turn off pool pumps and heaters when not needed. Run pool pumps with a timer for only 12 hours a day when needed.
- 26.** Verify livestock water tank heaters are off when not needed.
- 27.** Unplug battery chargers when not needed.

**DO A LITTLE.  
SAVE A LOT.**

EVERYTHING YOU DO - FROM FLIPPING A SWITCH  
TO UPGRADING YOUR LIGHTING - CAN ADD UP  
TO BIG SAVINGS FOR YOU AND YOUR FAMILY.

---

**SO TAKE YOUR PICK,  
AND SAVE YOUR MONEY.**

# KITCHEN

---

## KITCHEN APPLIANCE USE & REFRIGERATION CAN AMOUNT TO 15-20% OF YOUR MONTHLY ENERGY USE.

- 28.** Turn off coffee makers when not in use.
- 29.** Switch your refrigerator's power-saver to "ON," if available.
- 30.** Clean refrigerator coils annually.
- 31.** Regularly defrost refrigerator or freezer to avoid ice buildup.
- 32.** Set the refrigerator temp. to 34°-37°F and freezer temp. to 0°-5°F.
- 33.** Unplug unused refrigerators or freezers. Recycle them if you don't use them.
- 34.** Use microwave for cooking when possible.
- 35.** When cooking on the stove range, use pot lids to help food cook faster.
- 36.** If you are heating water on the stove, use hot tap water instead of cold.
- 37.** Remember to use the kitchen exhaust fan when cooking. Turn it off after.
- 38.** Use a slow-cooker instead of simmering foods on the stove.
- 39.** If rinsing dirty dishes before putting them in the dishwasher, use cold water.
- 40.** Use cold water for garbage disposal.
- 41.** Only run dishwasher when fully loaded.

# WATER HEATING

---

## WATER HEATING CAN AMOUNT TO 12% OF YOUR MONTHLY ENERGY USE.

- 42.** Install water heater wrap, also known as water heater blanket, per manufacturer's instructions.
- 43.** Drain 1-2 gallons from bottom of water heater each year to reduce sediment build-up.
- 44.** Install heat traps on hot and cold water lines when it's time to replace your water heater.
- 45.** Insulate exposed water lines.
- 46.** Limit shower length to 5-7 minutes.
- 47.** Install water saving shower heads.
- 48.** Repair dripping faucets.
- 49.** Don't let water run while you are shaving or brushing your teeth.
- 50.** For households with 1 or 2 members, a 115°F setting may work fine on water heaters.

# LAUNDRY

---

## WASHERS & DRYERS CAN AMOUNT TO 5-9% OF YOUR MONTHLY ENERGY USE.

- 51.** Wash clothes in cold water. Use hot water only for very dirty loads.
- 52.** Only do full laundry loads.
- 53.** If you must do smaller loads, adjust the water level in the washing machine to match the load size, especially when using hot water.
- 54.** Always use cold-water rinse.
- 55.** Clean your dryer's lint trap before each load.
- 56.** Make sure the dryer's outdoor exhaust door is not blocked or clogged.
- 57.** Verify dryer vent hose is tightly connected to inside wall fitting.
- 58.** Check that the dryer vent hose is tightly connected to dryer.
- 59.** Minimize clothes drying time; use an auto moisture sensor on dryer if available.
- 60.** Dry consecutive loads to harvest heat remaining in dryer from last load.
- 61.** In hot weather, avoid running the dryer during the heat of the day.
- 62.** Consider using a "solar-powered" clothes dryer: an old fashioned clothes line.
- 63.** Use bath towels at least twice before washing them.

# BRINGING THE POWER

# HEATING / AC

---

**HEATING & AIR CONDITIONING ARE USUALLY THE LARGEST LOADS IN A HOME AND RESPONSIBLE FOR 40-50% OF YOUR MONTHLY ENERGY COSTS.**

- 64.** Set thermostats to 78°F in summer and 68°F in winter.
- 65.** Install a programmable thermostat to save even more.
- 66.** Run ceiling paddle fans on medium, blowing down in summer and paddle fans on low, blowing up in winter.
- 67.** Turn off ceiling fans when leaving the room. Fans cool people, not rooms.
- 68.** When installing new air filters, make sure they are facing in the correct direction (look for arrow on side of filter.)
- 69.** When heating or cooling, keep windows closed.
- 70.** Insulate electric wall outlets and wall switches with foam pads.
- 71.** Caulk along baseboards with a clear sealant.
- 72.** Caulk around plumbing penetrations that come through walls beneath bathroom and kitchen sinks.
- 73.** Caulk electrical wire penetrations at the top of the interior walls in the attic.
- 74.** Close shades and drapes at night to keep heat in during the winter.
- 75.** Make sure drapes and shades are open during the day to catch free solar heat in the winter.
- 76.** Ensure attic access door closes tightly and is insulated.
- 77.** Make sure insulation in your attic does not block off vents.

# HEATING / AC

---

- 78.** Do not close off unused rooms that are conditioned by forced-air systems.
- 79.** Do not close supply air registers.
- 80.** Check to be sure return air grilles are not blocked by furniture or bookcases.
- 81.** Ensure windows and doors are properly weather-stripped & use door sweeps.
- 82.** Make sure outside soffit vents are not blocked.
- 83.** Do not use roof-top power ventilators for attic exhaust as they may draw conditioned air from your home.
- 84.** Have your HVAC system serviced once per year by a NATE-certified tech.
- 85.** Monitor your home's relative humidity in the summer. If it consistently stays in the 60% range or higher, ask your HVAC technician about lowering your central air conditioning unit's indoor fan speed.
- 86.** Ensure window A/C units are weather-stripped. Remove the unit in the winter and close and lock the window.
- 87.** Remove and clean window A/C filter monthly.
- 88.** Keep "fresh-air" vents on window A/C units closed.
- 89.** Use heavy-duty, clear sheets of plastic sealed tightly on the inside of windows to reduce the amount of cold air entering your home.
- 90.** Minimize use of electric space heaters, except for limited or temporary spot heating. Turn space heaters off when leaving.
- 91.** Ensure your outdoor heat pump/air conditioning unit is kept clean and free of debris.

# HEATING / AC

---

- 92.** When using the fireplace, turn down your heating system thermostat.
- 93.** When using the fireplace open the outside air vent in the fireplace (if provided) or open the nearest window slightly.
- 94.** Keep fireplace dampers closed unless a fire is burning.
- 95.** Ensure floor registers are not blocked with rugs, drapes or furniture.
- 96.** Caulk around storm windows and basement windows.
- 97.** Verify your ducts are tightly connected to your HVAC equipment. Well sealed and insulated ducts can save up to 10% on your energy bill.
- 98.** Turn off bathroom and kitchen exhaust fans 15 minutes after use, or install 15 minute timers on bathroom ventilator fans.
- 99.** Plant trees and shrubs to provide shade on the east, south and west sides of your home. Evergreen trees and shrubs can provide a windbreak on the north side.

# THE SOUTHERN PINE ELECTRIC MISSION

---

THE MISSION OF SOUTHERN PINE ELECTRIC'S BOARD OF DIRECTORS AND EMPLOYEES IS TO ENHANCE THE QUALITY OF LIFE OF OUR MEMBERS AND COMMUNITY BY SAFELY PROVIDING RELIABLE ELECTRIC ENERGY AT AN AFFORDABLE PRICE.
